

Pro<sup>2</sup>Future – Products and Production Systems of the Future – is a COMET competence center that attempts for next generation products and manufacturing machinery with embedded cognitive capabilities. It is a joint effort of world leading Austrian industrial enterprises and the nation's top scientific institutions in ICT and Production Engineering: Johannes Kepler University Linz, Graz University of Technology and Profactor GmbH. Furthermore, it is endorsed by the Provinces of Upper Austria and Styria, Austria's strongest regions in industrial leadership. Pro<sup>2</sup>Future operates three research sites in Linz, Graz and Steyr.

To broaden and support our research activities in the field of data-driven decision support we are currently offering the position of a

## Researcher

**Full-time (38,5 hours/week), at Pro2Future GmbH in Linz (Science Park at Johannes Kepler University Linz)**

### Project context:

Designing and evaluating a predictive maintenance system for industrial applications. Together with an internationally renowned industrial partners from the steel industry, we investigate how cognitive decision support can be applied to analyze large amounts of industrial data. In this regard, prediction models based on analytical methods as well as visual analytics approaches are to be researched, developed, and applied.

### Job profile:

The successful candidate will be engaged in computational data analysis and data-driven projects. To this end, one or more of the following skills are required: knowledge about information systems, data technologies, visual analytics, mathematical and statistical methods for data analysis. Experience in the field of artificial intelligence as well as software development (in particular web applications) are also of advantage. The successful candidate seeks an ambitious activity in industry-driven research and is particularly willing to obtain a PhD under supervision of Prof. Dr. Marc Streit at JKU Linz.

The successful candidate will work within an interdisciplinary project team consisting of experts including the industrial partners, project management and scientific partners. The candidate plays a major role in shaping and executing the projects' research agenda. Project work will also involve collaboration and knowledge exchange with the Pro<sup>2</sup>Future partners, several allied international research groups as well as participating in the international research community.

### Your qualification:

- A university-level degree in computer science, information systems, information science, mechatronics, telematics, mathematics, or related studies.
- Programming skills in a current development environment (JavaScript, Java, C++, C#, Python, ...)
- Fluent English, written and spoken. German is appreciated or the willingness to learn German is expected.

### We offer:

- The opportunity to align the research for your Ph.D. studies to a research project, starting as soon as possible.
- The opportunity to work in a young, dynamic, creative and collaborative team with strong ethos of mentorship and professional development as well as focused publication agenda.
- We will provide the successful candidate with a collegial and supportive environment to establish themselves and their careers, i.e. particularly the Ph.D. studies.
- Full-time gross salary for this position is 2,819 Euro per month (14 times a year).

Pro<sup>2</sup>Future GmbH is an equal opportunity and family-friendly employer. We particularly welcome applications from women and international candidates.

To apply for this position, please send your application (including CV, supporting documents, letter of motivation) via email to: [jobs@pro2future.at](mailto:jobs@pro2future.at)
