

Cognitive and Sustainable Products and Production Systems of the Future

Pro²Future – Cognitive and Sustainable Products and Production Systems of the Future - is an industry-related COMET K1 research Centre in the field of artificial intelligence (AI) and cognitive / industrial ICT, human-machine-interaction (HMI) and data-driven process optimization with a focus on cognitive and sustainable products and production systems. These are supported by the areas of Perception, Orchestration and Analytics. Further fields of activity of the Centre cover mechatronic systems, embedded systems, pervasive computing systems and big data analytics.

For strengthening our team, we are currently offering the position of a

Senior Researcher (m/w/d)

within the Area Cognitive Production Systems

Full-time (38,5 hours/week), at Pro²Future GmbH in Graz (Campus of TU Graz)

Project context

Cognitive Production Systems and Cognitive Products represent those research areas of Pro²Future in which application-driven integration takes place. In these two areas, the research results of Areas Prediction, Orchestration and Analytics are consolidated and transferred to industry and business in the form of integrated solutions. The Area Cognitive Production Systems focuses on both continuous production processes in plastics processing (at the Linz site) and batch production for manufacturing and assembly processes (at the Graz site). A central element in Pro²Future's understanding of Cognitive Production Systems are their contributions to sustainability, resource efficiency, and human centeredness.

Job profile

Under the guidance of the Area Management, the candidate will be deployed in the entire portfolio of application-oriented research projects in the research area. Based on his or her in-depth knowledge and **expertise in production (e.g. manufacturing, assembly, 3D printing) with interests in digitalization, sustainability and human centeredness**, he or she will successfully support the researchers in realizing the project objectives. Previous experience in industry or industry-related projects enables the candidate to fully understand, communicate and manage the requirements set by industry in the research projects.

Your qualifications

- PhD degree in mechanical engineering, production engineering, manufacturing, or similar
- Experience or willingness to learn programming languages and tools, e.g. Python
- High affinity for applied research, interest in shaping future technologies
- Ability and high motivation for funding acquisition, e.g. proposal writing
- Coordination and management experience preferred, e.g. in supervision of students
- Independent, efficient and reliable way of working, enjoy working in a collaborative and supportive team
- Fluent in English or German
- Willingness to travel between the Pro²Future GmbH locations and to our partners within Austria
- Flexibility, willingness to learn, openness and commitment

Our offer

- The opportunity to work in a highly qualified, international, young, and dynamic research team
- Collaboration in innovative, beyond state-of-the-art research projects
- Opportunity for personnel development in a learning and respectful environment
- Great emphasis on gender, diversity, and equal opportunities
- Flexible working hours, flat organizational structures, fun at work
- Full-time gross salary per month between EUR 4.900,00 and EUR 5.500,00 depending on appropriate qualifications and professional experience

Pro²Future GmbH aims to increase the proportion of women in the research area, we are therefore particularly looking forward to applications from qualified women!

DI Cosmina-Cristina Ratiu

I work on cognitive engineering project support, developing an approach and tool support for modeling complex and collaborative processes.

Matej Vukovic, M.Inf.

Our results give an insight into the Key Influencing Parameters for Blast Furnace and Electric Arc Furnace Operations in the Metal Industry.

DI Dr. Ouïjdane Guiza

I work on privacy respect and monitoring of human intensive assembly processes and cognitive line balancing support.
